**The Second National-Regional Symposium on**  
**The desertification phenomenon**

**At The Hall of Al-Shaheed Al-Sadr (Quds)**

**17/12/2014**

## **The Desertification phenomenon:**

The phenomenon of desertification is a process of land degradation caused by complex interactions among many factors such as: factors of physical, biological, political, social, cultural and economic influence in sustainable development through its association social problems such as poverty, poor health and nutrition lack of food security, the problems of migration, displacement of people and population dynamics. The people who live in areas have been affected or threatened by the desertification phenomenon, they must be at the center of attention or care of the process of combating the desertification and mitigating effects.

## **Environmental Science College:**
