

Biography: Professor Uğur Atikol, started his career as a mechanical engineer in Pearl Construction Ltd in 1988 and moved to Eastern Mediterranean University in 1990 to start a new career as an instructor. He is a professor in energy management, specializing in thermodynamics, building services and utility demand-side management. He is the director of the Energy Research Centre in Eastern Mediterranean University. He organized several international conferences, most notable ones being the 10th and 16th International Conferences on Clean Energy in 2010 and 2018. He guest-edited special issues related to these conferences in *International Journal of Energy Research*, *International Journal of Hydrogen Energy*, and *International Journal of Green Energy*. He took part as a local energy expert in the USAID funded Resource Efficiency Achievement Project (REAP) in 2007 where a group of engineers in the Turkish Cypriot community were trained for energy and water efficient practices. In 2008, he became a certified energy auditor, authorized by the Association of Energy Engineers (AEE). He served as a consultant in the solar energy installation projects supported by the European Union grant programs for the Turkish Cypriot community.

Affiliation: Eastern Mediterranean University, North Cyprus
